50 Years of Finnish Design and Expertise

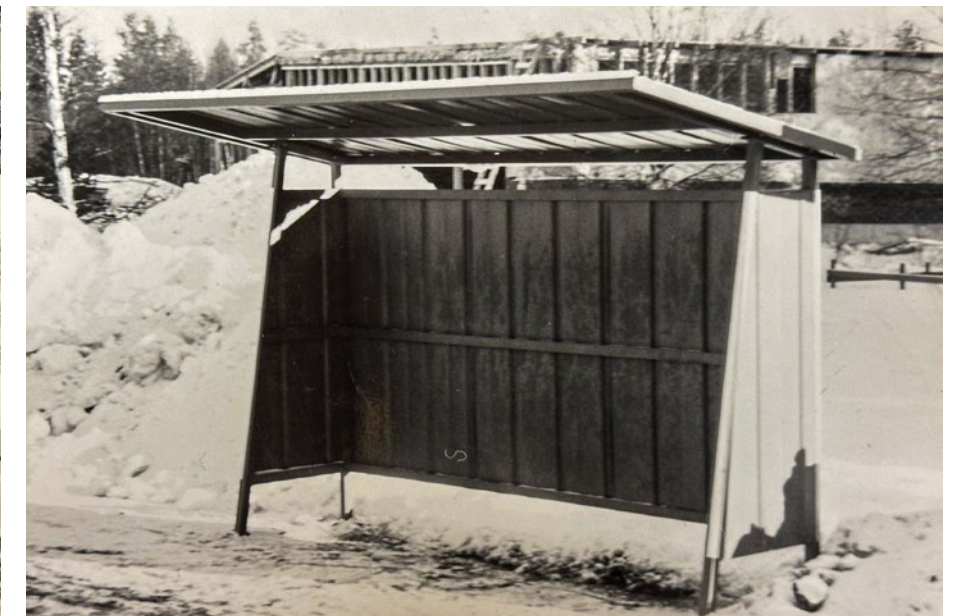

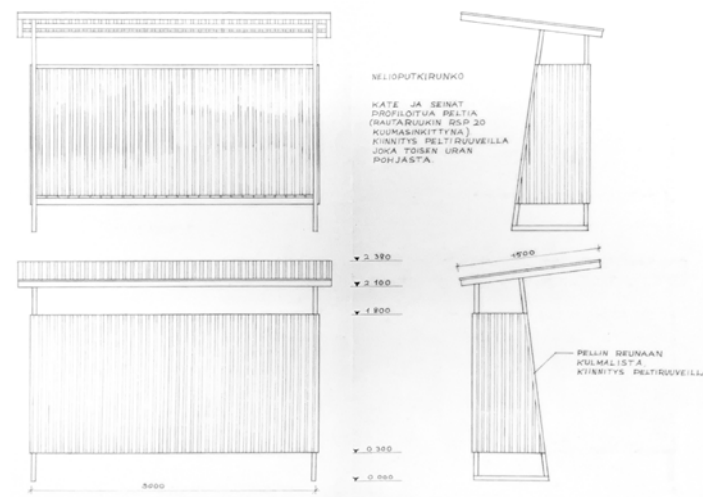

What began in 1972 with bus shelters designed for the Finnish National Board of Roads and Waterways has evolved into a complete collection of outdoor furniture created for the demands of the Nordic climate. Over the years, our range has been shaped by the wishes and feedback of our customers – and we intend to keep it that way.

Our goal is to create yard and park furniture that endures not just for years, but for decades. This customer-

oriented approach has been at the heart of our operations from the very beginning.

We strive for considered design that combines high quality with practicality. We believe that carefully designed and crafted products stand the test of time and bring joy to generations. Our ambition is that our products make everyday life better while supporting the adoption of a sustainable lifestyle.

Every product we create is a testament to Finnish design expertise and innovation.

Made in Finland.

Almost 90% of our revenue comes from products proudly carrying the **Key Flag Symbol**, a nationally recognized mark that signifies Finnish origin and quality. For international customers, it is a guarantee that our products are designed and manufactured in Finland – built to withstand demanding Nordic conditions.

By combining our own in-house production with trusted long-term partners, we ensure consistent excellence in quality as well as fast and reliable delivery times. Our flexible approach allows us to adapt to customer needs and tailor solutions to meet even the

most specific requirements. With our dedicated transport service, we make sure every product reaches its destination safely and on time.

We are certified by DEKRA with both **ISO 9001 Quality Management** and **ISO 14001 Environmental Management** standards. Our environmental policy emphasizes sustainability and recyclability, reflecting our commitment to responsible business practices. In all our operations, we follow the highest standards of legislation, regulation, and authority requirements.

QUALITY

Quality is reflected in every detail – from carefully selected materials and meticulous design to flawlessly finished products. With over fifty years of experience, Finture has gained a deep understanding of what true quality means and how it is achieved.

PRODUCTION

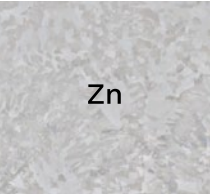

Our Finnish-made FINTURE and STREET UNIT products are manufactured and assembled in our own factories just outside Tampere. This commitment to local production has also earned us the **Key Flag Symbol**, a mark of Finnish origin and excellence.

RESPONSIBILITY

At Finture, responsibility means thoughtful material choices, ethical production processes, and the design of products built to endure both time and demanding weather conditions. Responsibility also extends within our company: it is about caring for our employees, partners, and the wider community.

STEEL

Steel is an essential part of Finture's product range, and we always prefer using high-quality Finnish steel. When a hot-dip galvanized surface is combined with powder coating, the result is extremely effective corrosion protection. In addition, some of our products incorporate stainless steel, Cor-Ten steel, aluminum, or zinc-epoxy powder-coated steel.

HOT-DIP GALVANIZING

Hot-dip galvanizing is a durable and environmentally friendly corrosion protection method, in which the components are immersed in molten zinc. This creates a corrosion-resistant surface that lasts for decades, remaining maintenance-free and unchanged. One of the advantages of hot-dip galvanizing is that molten zinc penetrates even into the inner parts of the structure.

POWDER COATING

Powder coating is a high-quality and environmentally friendly way to finish steel surfaces, providing a smooth and even result. Powder-coated surfaces are highly resistant to wear, weather variations, temperature fluctuations, and UV radiation. The powders used in powder coating are environmentally friendly, and no VOC emissions are released during the process. In addition, the powder can be recycled and reused.

WOOD

The wood materials we use come from PEFC- or FSC-certified forests, reflecting our commitment to sustainable forestry. We mainly offer two species: pine and Douglas fir. Nordic pine grows slowly in a cold climate, making it denser, harder, and particularly well-suited for outdoor furniture compared to other types of wood. All wood materials are carefully selected, and their surface treatments are environmentally friendly and non-toxic. Additionally, the pressure-treated wood we use is AB-class and free from chromium and arsenic.

VALTTI PLUS WOOD OIL

Tikkurila's Valtti Plus Wood Oil prevents cracking and provides excellent protection against moisture, making wooden surfaces weather-resistant. Of the total organic carbon content in Valtti Plus Wood Oil, 75% has been replaced with bio-based components (measured according to ASTM D6866-18), meaning that 18% of the product's total content is bio-based.

HDPE ECODUR

HDPE ECODUR is a recycled plastic material that is both durable and environmentally friendly. It withstands UV radiation and changing weather conditions, offering a high-performance and sustainable alternative to traditional materials.

PC SHEET

Polycarbonate is highly impact-resistant, making it an excellent alternative to tempered glass in structures such as shelters. As a UV-protected material, it also retains its transparency for a long time.

ENVIRONMENTAL FURNITURE

Finture's outdoor furniture collection brings together **durability, style, and functionality** for any setting – from private gardens to city spaces. Delivered fully assembled or in easy-to-install modules, our products are designed for immediate use.

With a wide range of benches, tables, litter bins, and accessories, every piece can be **customized in design and color** to fit seamlessly into its surroundings. Smart details, such as optional armrests, add comfort and practicality.

Our furniture is built to withstand time and weather while enhancing everyday environments. Whether for a private yard or a public park, Finture offers **sustainable, adaptable, and timeless solutions** for creating spaces that both work and inspire.

PYYNIKKI

Designed by Pinja Palomäki, the **Pyynikki product family** brings modern elegance to urban environments by combining durable design with natural materials. Its bench and table combinations create stylish meeting points for public spaces, while the bicycle shelter and racks provide secure and functional storage solutions without compromising on refined appearance.

The combination of zinc-primed and powder-coated steel with high-quality Douglas fir ensures both durability and a timeless aesthetic. With its blend of strength, functionality, and design, the Pyynikki collection is an **ideal choice for furnishing contemporary urban spaces**.

OTHER OUTDOOR FURNITURE

Greenery, cleanliness, safety and comfort to urban spaces

Finture's selection includes a wide range of high-quality outdoor furniture that enhances and enriches the character of cities and outdoor spaces. The range features, among others, **planters**, **litter bins**, **bollards**, **barriers**, and various yard structures such as pergolas.

Planters bring greenery and a natural touch to urban areas, while stylish litter bins help keep spaces clean. Bollards and barriers add safety by guiding pedestrian and vehicle movement effectively. Pergolas and other garden structures create inviting and sheltered places to spend time.

Finture's outdoor furniture is suitable for many different environments – from city parks and public buildings to pedestrian streets and private yards. Beyond meeting practical needs, they also contribute to the **visual identity and functionality** of their surroundings.

SHELTERS

Finture's shelter range represents Finnish design and manufacturing at its best. It covers **CE-marked bus, bicycle, and general-purpose shelters, as well as terminal structures**. As Finland's longest-standing shelter manufacturer, Finture has been involved in designing many familiar roadside shelters – for example, the original TVH shelter, created in cooperation with the Finnish Board of Roads and Waterways, was designed by Finture.

We provide **high-quality and durable solutions** for infrastructure, streets, and yards. Our shelters stand out for their versatility and structural excellence. The load-bearing steel frames comply with the EN 1090-1 standard, ensuring safety and reliability. CE marking is mandatory for all load-bearing structures of shelters.

At Finture, we understand that every project and environment is unique. That is why we offer the possibility to customize shelters according to customer needs – with different colors, roofing materials, and accessory options. This allows the shelters to be tailored both visually and functionally to suit their intended use.

Finture's shelter range offers versatile, safe, and aesthetically pleasing solutions, ideally suited to public spaces as well as private courtyards. Whether you need a bus stop, bicycle shelter, or a general-purpose canopy, we provide the right solution for every need.

VOIMA

The Voima shelter is an elegant, high-quality addition to Finture's shelter collection. Its modular design is available in both single- and double-sided models, with adjustable spacing between the posts.

Versatile in use, the Voima shelter is perfectly suited for terminals,

bus stops, and bicycle shelters, with space to accommodate various bike racks underneath.

With its stylish design, robust construction, and adaptability, the Voima shelter offers an **attractive and durable solution** for a wide range of environments.

“MODERN TOWN” BUS SHELTER WITH ACCESSORIES

“CITY” BUS SHELTER WITH ACCESSORIES

PLAYGROUND EQUIPMENT & OUTDOOR EXERCISE

PLAYGROUND EQUIPMENT

Our safe and high-quality playground equipment creates a positive impression in yards and parks alike. The range includes swings, sandboxes, spring riders, seesaws, and balance beams. All of our play equipment complies with the EN 1176 safety standard.

OUTDOOR EXERCISE EQUIPMENT

We create environments that inspire physical activity for people of all ages. Our collection includes **standard-compliant multi-sport arenas, ball walls, and outdoor fitness units** – providing fun and wellbeing for every user.

PLAYGROUND

SWINGS

Children's swings are a classic element of playgrounds, offering opportunities for **movement, fun, and social interaction**. Their simple yet functional design makes them a timeless and essential part of outdoor play.

Swings are available with steel or wooden frames, multiple installation options depending on the site, and a variety of seat alternatives.
